

The Vision of China's Terra Cotta Army

January 1, 2014

By the Spirit I heard a man's voice speaking Chinese. Then in a vision I saw the man who was speaking. He spoke with authority giving direction to those that would hear. His name is Jesus.

I then saw the Lord speaking with intensity to figures that appeared like the Terra Cotta Army. They are His army, His Church in China, but they are frozen, unable to follow Him into battle that He is calling them to. But as He commanded them to move, the figures came to life and the terra cotta that encased them fell down around their feet. Similar Ezekiel 37 where the Lord commanded Ezekiel to prophesy to dry bones, the Terra Cotta army came alive and began to march with freedom and speed.

I then saw a map of China and His leaders from every corner of the nation coming together to receive His commands and direction. They will be given a unity in the Spirit that will express itself in love one for another. In this way the nation of China will know that they are the Lord's disciples.

The bringing together of Chinese leaders to experience the unity that the Spirit will bring will lay the foundation for a mighty revival and a gathering of souls into the Kingdom of God.

Note: A gathering of Christian leaders in China at this time would be dangerous for Chinese nationals. Large gatherings would only provide an effective means for the communist government to capture many Christian leaders. Wisdom, insight and understanding from the Spirit is needed to know how, when and where to gather His leaders.

The Lord released a vision to me in late September 2013 that describes multiple types of judgment that will fall upon that nation. During that time the government will begin to seek the favor of the true Church in China. I believe at that time, we will see the favor of the Lord upon the Church that will open the doors for massive gatherings of His leaders. The Spirit knows the perfect time.

Many thanks to Gary Holton and Greg Sucilla for their insights regarding this vision and the current state of affairs in China.
